Explore Our Range Of

Oleochemicals

For Everyday Products

Apical

A leading processor of vegetable oil

Apical is a leading vegetable oil processor with an expanding global footprint. Our vertically integrated mid-stream refining and value-added downstream processing makes us an integral supplier that supports the needs of various industries namely food, feed, oleochemicals and renewable fuel, including sustainable aviation fuel (SAF) which enables a great reduction of CO₂ emissions.

With integrated assets in strategic locations spanning Indonesia, China and Spain, Apical operates numerous refineries, oleochemical plants, renewable fuel plants and kernel crushing plants. Through joint ventures and strategic partnerships, Apical also has processing and distribution operations in Brazil, India, Pakistan, Philippines, Middle East, Africa, USA and Vietnam.

Apical's growth is built on the foundations of sustainability and transparency, and motivated by our strong belief that we can contribute to a circular economy for a more meaningful impact, even as we continue to grow our business and deliver innovative solutions to our customers.

Starting materials for many different everyday products

Vegetable oils especially those derived from palm fruits have a major advantage compared to other oil crops due to its high productivity and overall efficiency. It is regulated and produced in a sustainable manner, making it an eco-friendly choice.

Apical produces a range of products under its Oleochemicals business segment namely Fatty Acids, Refined Glycerine, Soap Noodles and Animal Nutrition among others. Through an experienced team with the technical knowhows, Apical provides customers with application advice, product customisations and innovative solutions.

Fatty Acids

APICID

APICID, Apical's Fatty Acid product range is palm based and various chains of fatty acids are produced through the splitting, fractionation and distillation process.

Fatty Acids are used widely in personal care products, cosmetics, detergents, soap, pharmaceuticals, food, lubricants, paints and coating, resins, rubber and plastics, textiles auxiliaries and candles among others.

OUR FATTY ACIDS INCLUDE:

- Caproic Acid
- Caprylic Acid
- Capric Acid
- Caprylic-Capric Acid Blend
- Lauric Acid
- Myristic Acid
- Palmitic Acid
- Oleic Acid
- Stearic Acid
- Triple Pressed Stearic Acid
- Rubber Grade Stearic Acid
- Distilled Coconut Fatty Acid
- Distilled Palm Kernel Fatty Acid
- Distilled Palm Stearic Acid
- Distilled Palm Oil Fatty Acid

Refined Glycerine

APICERINE

Refined Glycerine is colorless, odorless and sweet tasting. It is widely used in personal care products, cosmetics, pharmaceutical, surface coating, inks, tobacco products, textiles, lubricants, solvent, emollients, thickening agent, urethane, polymers, soap and sweetener (for food & beverage and confectioneries) among others.

It is also used as an intermediate in the production of epichlorohydrin, anti-freeze, and propylene glycol.

Soap Noodles

APISALT

Soap Noodles are the fatty acids derived either from vegetable oil or animal fats. It is produced from the saponification of neutral fats and oil, neutralisation of fatty acid and saponification of methyl esters. Soap Noodles are used as the main ingredient in soap bars, cosmetic, laundry soap, industrial soap and other specialty applications.

APISALT, Apical's soap noodles is vegetable based and derived from palm. Our product range includes the following and the selection depends on a customer's formulation and products.

VEGETABLE OPAQUE SOAP BASE

- 8020S / 8021S
- 7525S / 7030S

Standard vegetable soap with various oil composition, comprising of a blend of palm and palm kernel. The whiteness and high colour stability ranks this soap base.

NATURAL SOAP BASE

EDTA free soap that is often used as the new green soap base for cosmetics and toiletries product.

LUXURY SOAP BASE

Soap base with high lauric content that promotes high and dense lathering compared to standard soap.

CUSTOMISED SOAP BASE

Commercial and customised formula can be developed depending on preferred application properties.

Animal Nutrition

OPTYMAX

Feed fats are essential to animal nutrition. The quantity of oil and fat that should be used in animal diets differ according to the species and their digestive systems.

Optymax, Apical's well formulated animal nutrition product range for ruminants, monogastric, poultry and others are made from sustainably sourced fatty acids and their derivatives. With a highly concentrated source of fats, these nutrients are developed to boost energy, milk yields and ensure consistent productivity.

OUR ANIMAL NUTRITION PRODUCT RANGE INCLUDES

- Palmitic Series
- Triglyceride Series
- Calcium Salt Series

Apical

Sustainability, the heart of our business

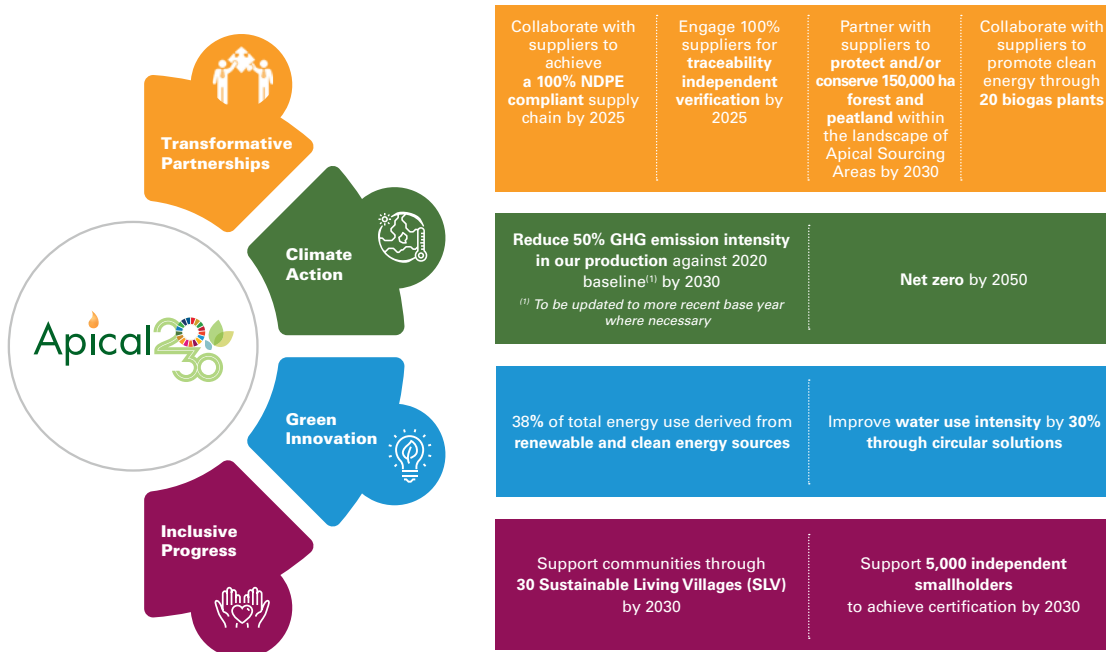

Apical2030

5Cs Business Philosophy

Apical2030 is our strategic sustainability initiative that maps the future direction for the Group. Anchored to meaningful social and environmental impacts, Apical2030 focuses on four strategic pillars.

Sustainability is our way of thinking, being and running our business. We are guided by our 5Cs business philosophy of doing what is good for the community, country, climate, customer and only then, will it be good for the company.

Apical Sustainability Policy

Our Sustainability Policy outlines our commitment to ensuring sustainable practices are adopted across the entire value chain of our palm oil production, from cultivation to processing and delivery to end users.

We work to ensure that our suppliers comply with our sustainability commitments, local laws and regulations. We will source our supply only through networks that are transparent and traceable.

A-SIMPLE Framework

Apical Sustainability Implementation (A-SIMPLE) Framework is our mechanism to ensure the effective implementation of our Sustainability Policy.

A-SIMPLE Framework includes the following components:

View our [Sustainability Progress Dashboard](#) on Apical's website for more information on the progress of our Sustainability Policy, our anchor programmes, and our sustainability transformation journey.
